PROFILE

Senior performance marketer with nearly 5 years in high-ticket lead generation. I own about ₹62L a month across Meta and Google and plan it with leadership against revenue targets. I grow revenue by tying ad spend to CRM sales, and use analytics and AI automation, built with Claude Code, to find what works faster.

WORK EXPERIENCE

Senior Performance Marketer, Imarticus Learning Jan 2024 - Present

Revenue and budget

- Own the monthly media plan of about **₹62L (₹7Cr+ a year)** across Meta and Google for 3 programmes: PG Analytics, PGA Pro and Digital Marketing, planned with VPs against revenue targets.
- In October one programme reached **151% of its revenue target**, earning **₹5.6 for every ₹1 spent**; in September another hit its full target on **81% of budget**.
- Cut **cost per lead by about 37%** with better lead forms and 4 to 5 creative tests a month; earned ₹3.2 per ₹1 across a quarter.

Attribution and analytics

- Built **marketing mix models (MMM)** on 312K leads and 6,386 sales to measure how many sales the ads really caused, not just what CRM tags claimed.
- Connected the CRM to Meta via **Conversions API (CAPI)**: MQL, SQL, L3 and junk stages, so ads optimise for quality.
- Reviewed **230 sales calls** with Gemini to rank buying objections and define the best buyers: **6% of leads gave 25% of buyers**.

Funnel and conversion

- Raised the Meta lead rate from **0.75% to 1.30%**; on Google Search **6.4% of clicks became leads**, helped by 800+ negatives pushed through Google Ads API scripts.
- Showed that leads called within 1 hour bought at **13.3%**, against 0.9% after 7 days, and that "Yes" answers to a will-you-pay question bought **6x more often**.
- Lifted scholarship form completion from **6% to 16%** with WhatsApp and email automation.

Digital Marketer (Founding Team), Bversity Jul 2022 - Dec 2023

- Earned **₹3.3 for every ₹1 spent** selling a ₹1.5L course, with marketing automation and lead management built end to end.
- More than doubled ad click rate, from **0.35% to 0.85%**, through creative and audience tests.

Early Career: Lead Generation, Email Marketing and Graphic Design roles Dec 2020 - Jun 2022

AI TOOLS AND AUTOMATION I BUILT (WITH CLAUDE CODE)

- **AI marketing agent:** chat assistant with 100 actions: sends messages, builds campaigns, makes images, reads CRM data.
- **WhatsApp sales agent:** replies to ad leads, qualifies them, follows up for 72 hours and hands warm leads to sales.
- **Workflow builder:** drag-and-drop WhatsApp, email and SMS journeys triggered by lead actions; used by a paying client.
- **AI analysis workflows:** creative (282 competitor ads), ad set quality with CRM sales, keywords, landing pages and sales calls.
- **Ads intelligence brain:** checks every ad daily with 3 diagnosis trees to find the root cause (creative fatigue, audience limits, landing page mismatch); 19-signal health score, fatigue warning 5 days early, fixes ranked by priority.
- **CAPI signal engine:** rules that turn CRM stage changes (MQL, SQL, L3, junk) into Meta conversion events with value.
- **Automated data jobs:** a headless server on DigitalOcean runs scheduled SQL analysis and hourly CRM and ad syncs; Coefficient feeds Google Sheets; AI refreshes image ads each evening.

SKILLS

Paid media: Meta Ads, Google Ads, LinkedIn Ads, lead forms, creative testing, budget planning, Canva, Figma
Data and infrastructure: MMM, incrementality tests, SQL, Python, LeadSquared, Coefficient, DigitalOcean, Excel, Sheets
